## OBJECTIVE:

A highly skilled individual currently excelling as a Data Analyst at FeetoBistro, armed with certifications in Data Science and Analytics from UpGrad Campus and Business Analytics from Tri Up. With a proven track record of leveraging expertise in analytical tools such as Python, Excel, and SQL, along with a keen understanding of statistical methodologies, I am dedicated to driving data-driven insights and solutions in a professional setting. Motivated by a passion for extracting actionable intelligence from complex datasets, I am committed to continuously enhancing my skills and contributing to the success of the organization through innovative data analysis techniques and strategic decision-making.

## EDUCATION:

**C.L.R DEGREE COLLEGE, CUMBUM.**                                                                                         **Dec 2021**
**Affiliated to Acharya Nagarjuna University Guntur.**
B.sc, Computer Science

## EXPERIENCE:

**Data Analyst at FeetoBistro**                                                                                        **Feb 2024 to present**

- Implemented and managed restaurant-specific data connections between MySQL databases and Power BI, facilitating tailored analysis for each location.
- Developed login and logout dashboards for individual restaurants, providing secure access to personalized insights and performance metrics.
- Utilized Power BI to create dynamic and interactive dashboards for restaurant managers, enabling them to monitor key performance indicators such as sales, expenses, and profitability.
- Integrated embedded links within the dashboards, allowing restaurant managers to conveniently access and analyze their insights in real-time.
- Customized visualizations within Power BI to showcase restaurant-specific data, including sales trends, vendor payments, outgoing and incoming payments, food costs, and profits.
- Conducted regular training sessions for restaurant staff on how to interpret and utilize the dashboards effectively for informed decision-making.
- Leveraged SQL queries to extract and manipulate restaurant-specific data for deeper analysis and to address specific business questions or concerns.
- Collaborated with restaurant management teams to understand their unique requirements and continuously refine the dashboards to meet evolving needs.
- Provided ongoing support and troubleshooting for restaurant managers to ensure seamless access to their insights and dashboards.

**Data Analyst Intern at FeetoBistro**                                                                                     **Dec 2023 to Jan 2024**

- Collaborated with the analytics team to assist in implementing and managing restaurant-specific data connections between MySQL databases and Power BI.
- Contributed to tailoring data analysis for each location, ensuring insights were relevant and actionable for individual restaurant managers.
- Worked on the development of login and logout dashboards for individual restaurants, participating in the design of secure access mechanisms.

**Business Analyst Intern**                                                                                             **Nov 2023 to Feb 2024**
**LMS and Airline application Project**
**Tri-up Ed-tech Pvt Ltd. India**

- Supported senior business analysts in various tasks, including requirements gathering and data analysis
- Assisted in the preparation of documentation such as business requirements documents and process flow

diagrams
- Participated in meetings with stakeholders to gather feedback and provide updates on project progress
- Analysed case studies to identify business problems and propose solutions
- Conducted research and gathered requirements from stakeholders
- Utilized Excel for data analysis and visualization
- Presented findings and recommendations

**Data Science trainee, UpGradCampus, (Apprenticeship)**                    **Dec 2022 - July 2023**
- Operated & Experimented With 10+ Advanced Tools.
- Strengthened Domain Knowledge on Python , Excel , SQL , MySQL , Power Bi .
- Modeled 15+ Industry Projects on Data science and Data analytics.

## SKILLS:

**Analytical Tools**:
- Power BI
- Advanced Excel

**Programming Languages**:
- SQL
- Python

**Database**:
- MySQL

| | |
|---|---|
| Requirements Gathering | Communication |
| Quality Assurance | Problem-Solving |
| Software Development Life Cycle (SDLC) | Stakeholder Management |
| Prototyping and Wireframing | Collaboration |
| | Attention to Detail |

**Key Skills:**
- Strong positive attitude and quick adaptability and flexibility with work.
- Possessed good communication skills and Leadership qualities.
- Self-starter and seeks new challenges and responsibilities.
- Ability to organize and prioritize the tasks and work under pressure.
- Possessing a strong will to develop the spirit of teamwork.
- Ability to work both independently and as part of a team with professionals of all levels.
- Quick learner, able to grasp new ideas, concepts, and methods.
- Programming & Computation: SQL, HTML , CSS , BOOTSTRAP ,MYSQL
- Other Skills: MS Office

## PROJECT EXPERIENCE: [All Projects Link]
**IMDB data analysis** – RSVPmovies [SQL]

- Create a database and insert the data for analysis.
- Then Perform a data analysis using SQL queries on tables.
- Finally created a meaningful insights that can help RSVP movies to start their new project.
- Given some recommendations to RVSP movies based on insights and it will help for next project.

**Presence Analysis** - HR Analytics [Tableau | Excel]

- Designed a tableau dashboard to track employee data for the HR-Team, including employee count , performance , department wise attrition , Active employees and employee age. The dashboard streamlined HR processes and increased efficiency.
- This dashboard can save 3-4 hours of work for the HR daily.

**Sales Insights** – Super Market[Power BI | SQL]

- Designed a Power Bi dashboard to understand sales trend.
- The final dashboard was effective at display sales trend, allowing users to understand the data and make informed decisions.

**Car price prediction for Geely Auto -** [Python | Machine Learning]

- Clean & modelling the unstructured data using python and perform a exploratory data analysis.
- And after create a data train and test and rescalling the data for analysis.
- Using linear regression algorithm to do model building and residual analysis and finally create a model evaluation.
- It will help to predict a price of cars using data.

**CERTIFICATIONS/ AWARDS: [ All Certificates Link]**

- Data science and analytics completion certificate from upgrad campus.
- Business Analyst completion certificate from tri up ed-tech.
- Accenture data analytics and visualization virtual experience certificate from forage.
- SQL certificate from hacker rank.
- KPMG data analytics consulting virtual internship certificate from forage.
- Data modelling for power bi completion certificate from sqlbi.
